

Transformations – Mixed Questions

For Q1-2, make sure you label the **object** and **image**.

ROTATION

1) Reflect this shape in the line $y = -x$

2) Reflect this shape in the line $x = -1$

3) Write the equation of the line of reflection.

Equation: _____

4) Write the equation of the line of reflection.

Equation: _____

TRANSLATION

5) A point $(3,5)$ is translated to $(1,6)$. What was the translation vector?

6) A point $(-3,5)$ is translated by the transformation vector $\begin{pmatrix} -2 \\ -3 \end{pmatrix}$. What is the resulting point?

7) A point $(-2, 3)$ is translated by the transformation vector $\begin{pmatrix} -3 \\ 4 \end{pmatrix}$. What is the resulting point?

8) A point $(-2,5)$ is translated to $(6,1)$. What was the translation vector?

For Q9-10, make sure you label the object and image.

9) Translate the following shape by the translation vector $\begin{pmatrix} 3 \\ -4 \end{pmatrix}$.

10) Translate the following shape by the translation vector $\begin{pmatrix} -2 \\ -3 \end{pmatrix}$.

11) What was the translation vector?

ROTATION

12) Rotate this shape 180° about the point (-1, 1).

13) Rotate this shape 90° anticlockwise about the point (1, 1).

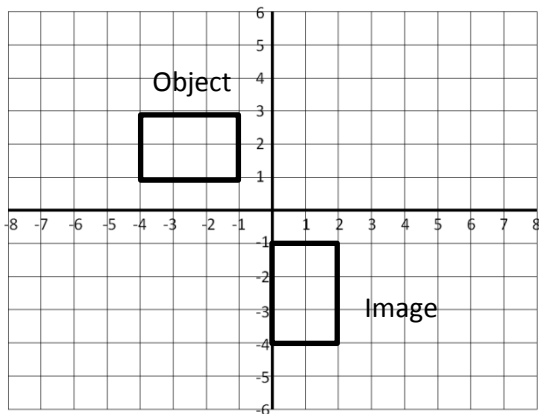

14) Rotate this shape 90° clockwise about the point (-2, 2).

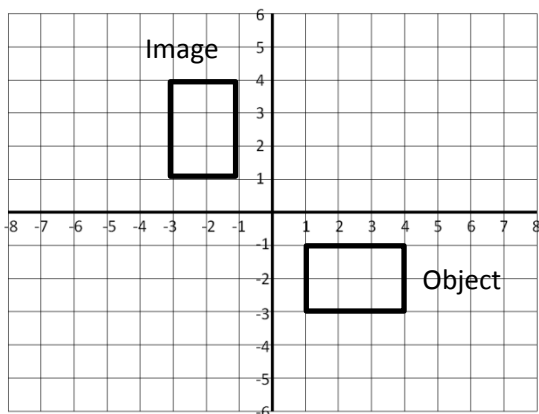

15) Describe the rotation.

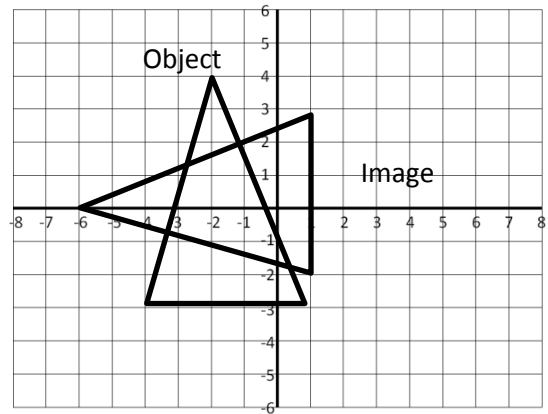

16) Describe the rotation.

17) Describe the rotation.

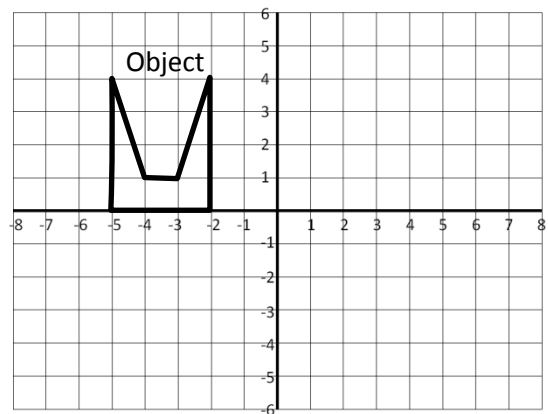

18) Describe the rotation.

MULTIPLE TRANSFORMATIONS

19) Transform this shape by first reflecting it in the line $y = -x$, then rotating it 90° clockwise about the point $(3, -2)$.

20) Transform this shape by translating it by $\begin{pmatrix} -1 \\ 7 \end{pmatrix}$, then rotating it 180° about the point $(0,1)$.

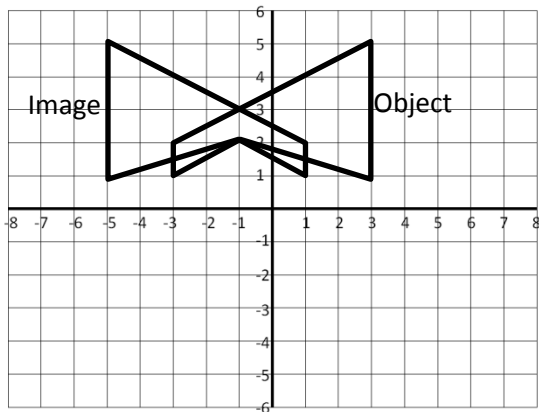

Transformations – Answers

ROTATION

1) Reflect this shape in the line $y = -x$

2) Reflect this shape in the line $x = -1$

3) Write the equation of the line of reflection.
Equation: $y = x$

4) Write the equation of the line of reflection.
Equation: $y = -1.5$

TRANSLATION

5) $\begin{matrix} -2 \\ 1 \end{matrix}$

6) $(-5, 2)$

7) $(-5, 7)$

8) $\begin{matrix} 8 \\ -4 \end{matrix}$

9) Translate the following shape by the translation vector $\begin{matrix} 3 \\ -4 \end{matrix}$.

10) Translate the following shape by the translation vector $\begin{matrix} -2 \\ -3 \end{matrix}$.

11) What was the translation vector?

$\begin{matrix} 7 \\ -6 \end{matrix}$

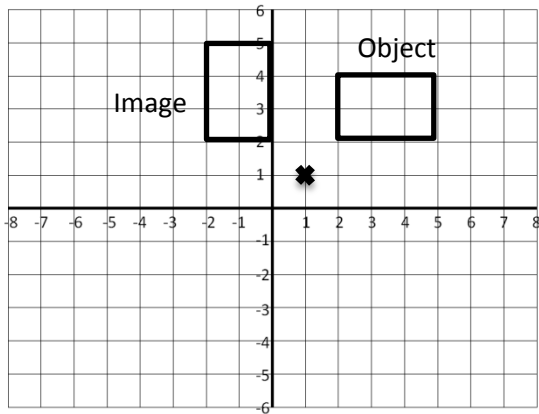

ROTATION

12) Rotate this shape 180° about the point (-1, 1).

- 15) Describe the rotation.
180° about the point (-1, 0).
- 16) Describe the rotation.
90° clockwise about the point (-3, -2).
- 17) Describe the rotation.
90° anticlockwise about the point (-2, -2).
- 18) Describe the rotation.
90° anticlockwise about the point (-2, 0).

13) Rotate this shape 90° anticlockwise about the point (1, 1).

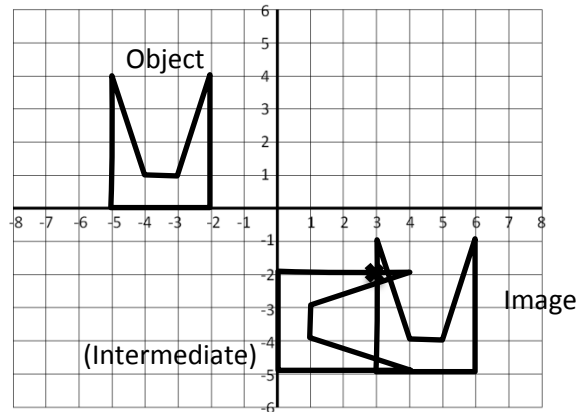

14) Rotate this shape 90° clockwise about the point (-2, 2).

MULTIPLE TRANSFORMATIONS

19) Transform this shape by first reflecting it in the line $y = -x$, then rotating it 90° clockwise about the point (3, -2).

20) Transform this shape by translating it by $\begin{pmatrix} -1 \\ 7 \end{pmatrix}$, then rotating it 180° about the point (0,1).
